

Joint Forest Sector Questionnaire: Provisional 2016 data

Publication date: 18 May 2017

Coverage: United Kingdom

Geographical breakdown: None

The Joint Forest Sector Questionnaire (JFSQ) collects data on removals, production and trade of wood and wood products. Statistics are collected annually and the collection is co-ordinated by a number of international organisations: Eurostat,

Notes:

1. In the JQ1 and JQ1 OB tables, "removals" data is as delivered to processors and
2. The product codes tables are provided as guidance by international organisations, the exact list of commodity codes used by the Forestry Commission for specific JQ categories can differ.

List of Tables

[JQ1 OB: Removals over bark](#)

[JQ1: Removals and production](#)

[JQ2: Trade](#)

[JQ3: Trade in secondary processed wood and paper products](#)

[Glulam and X-lam](#)

[ECE-EU: Trade in roundwood and sawnwood by species](#)

[EU1: Trade with countries outside the EU](#)

[EU2: Removals by type of ownership](#)

[Conversion factors](#)

[Product codes for the JQ2 and EU1 tables](#)

[Product codes for the JQ3 table](#)

UK data that is submitted to international organisations via the JFSQ is published twice a year, in May (provisional data) and September (final data) at:

www.forestry.gov.uk/forestry/inf-d-7aqhzh

Next update:

28 September 2017: final results for 2016

17 May 2018: provisional results for 2017

Issued by: IFOS - Statistics, Forest Research,
231 Corstorphine Road, Edinburgh, EH12 7AT

Definitions:

Glulam: Builders' carpentry also includes glue-laminated timber (glulam), which is a structural timber product obtained by gluing together a number of wood laminations having their grain essentially parallel. Laminations of curved members are arranged so that the plane of each lamination is at 90 degrees to the plane of the applied load; thus, laminations of a straight glulam beam are laid flat. [from HS 4418, Builders' joinery and carpentry of wood, including cellular wood panels, assembled flooring panels, shingles and shakes]

X-lam: Panels consisting of laths of roughly sawn wood, assembled with glue in order to facilitate transport or later working. [from HS4421, Other articles of wood]

	Coniferous	1000 m ³	5,450	5,138
	Non-coniferous	1000 m ³	397	403

Note:

- Ownership categories correspond to those of the TBFRA.
 - State forests: Forests owned by national, state and regional governments, or government-owned corporations; Crown forests.
 - Other publicly owned forests: Forests belonging to cities, municipalities, villages and communes.
 - Private forests: Forests owned by individuals, co-operatives, enterprises and industries and other private institutions.
- The unit should be solid cubic metres, under bark.

+++ denotes data not available.

The following factors have been used to convert between cubic metres (m³) and metric tonnes:

Product	m³ / tonne
Fuelwood, including wood for charcoal	1.38
Wood chips, sawdust, etc	1.48
Industrial roundwood (wood in the rough) - softwood	1.43
Industrial roundwood (wood in the rough) - hardwood	1.25
Sawnwood - softwood	1.82
Sawnwood - hardwood	1.43
Veneer sheets	1.33
Plywood, particleboard	1.54
Hardboard	1.053
MDF (medium density fibreboard)	1.667
Insulating board - density 0.35-0.5 g/cm ³	1.667
Insulating board - other	4

HS: The Harmonised Commodity Description and Coding Systems, a multipurpose international product nomenclature developed by the World Customs Organization (WCO), comprises up to six digits and is updated every 4 – 6 years.

CN: The Combined Nomenclature of the EU is identical to the HS on the first six digits and comprises two extra digits, making it more detailed than the HS. It is updated and published every year.

How to interpret the notation: The dots are used for readability and have no meaning. A code ending in "0" means that all subcodes are to be included, e.g. 47.03.10 includes subcodes 47.03.11 and 47.03.19. If only 4 digits are indicated, all subcodes are included, e.g. 47.06 includes 47.06.10, 47.06.20, 47.06.30, and 47.06.90. Code numbers separated by "/" mean that all the following codes ending in the digits indicated (and their subcodes) are to be included.

The term "ex" means that only part of the data available under a code is usable because the code encompasses a wider product range. For instance, "ex44.07.99" under "Sawnwood - of which tropical" means that only part of the data under HS-code 44.07.99 is usable, because insufficient detail is available. However, the table shows that CN code 440799.96 is sufficiently detailed to identify "Sawnwood - of which tropical". In case even the CN is not detailed enough, bold print is used in the CN column. Many tropical timber products contain "ex" codes in the above list, since the HS explicitly recognises less than 100 tropical timber species. Species not explicitly recognised as tropical are grouped in "other" categories with non-tropical, non-coniferous timbers that are likewise not explicitly recognised by the HS (e.g. 44.07.99). Estimates of tropical timber trade totals therefore require that these "other" categories be analysed to ascertain how much of the total was sourced from tropical countries. This can only be done at country level; Eurostat produces

Codes for the JQ3, EU and EFTA countries

JOINT FOREST SECTOR QUESTIONNAIRE

Trade in Secondary Processed Wood and Paper Products
CROSS REFERENCE between the HS (**bold print**) and the CN (**normal print**)

Code		Classifications			
		CN 2012	CN 2011	HS2012	HS2007
11	Secondary wood products

HS: The Harmonised Commodity Description and Coding Systems, a multipurpose international product nomenclature developed by the World Customs Organization (WCO), comprises up to six digits and is updated every 4 – 6 years.

CN: The Combined Nomenclature of the EU is identical to the HS on the first six digits and comprises two extra digits, making it more detailed than the HS. It is updated and published every

How to interpret the notation: The dots are used for readability and have no meaning. A code ending in "0" means that all subcodes are to be included, e.g. 49.00 includes all codes from 49.01 to 49.11. If only 4 digits are indicated, all subcodes are included, e.g. 48.18 includes 48.18.10, 48.18.20, 48.18.30, 48.18.40, 48.18.50 and 48.18.90. Code numbers separated by "/" mean that all the following codes ending in the digits indicated (and their subcodes) are to be included.

The term "ex" means that only part of the data available under a code is usable because the code encompasses a wider product range. For instance, "ex94.06" under "Prefabricated buildings - of which made of wood" means that only part of the data under HS-code 94.06 is usable, since mobile homes and prefabricated buildings of wood, iron or steel are all lumped together under that code. However, the table shows that the CN classification covers sufficient detail to identify "Prefabricated buildings of wood". In case even the CN is not detailed enough, bold print is used in the CN column. Many tropical timber products contain "ex" codes in the above list, since the HS explicitly recognises less than 100 tropical timber species. Species not explicitly recognised as tropical are grouped in "other" categories with non-tropical, non-coniferous timbers that are likewise not explicitly recognised by the HS. Estimates of tropical timber trade totals therefore require that these "other" categories be analysed to ascertain how much of the total was sourced from tropical countries. This can only be done at country level; Eurostat produces foreign trade data for all countries
