

UNECE Timber Forecast Questionnaire 2016: UK forecasts

Release date: 6 October 2016

Coverage: United Kingdom

Geographical breakdown: None

The TF is published annually at:

www.forestry.gov.uk/forestry/infd-7aqjql

The UNECE Timber Forecast (formerly Timber Committee) Questionnaire (TF) collects estimates for the current year and forecasts for the coming year of removals, production and trade of wood and wood products. Statistics are

Notes:

1. In the TF1 table, "removals" data is as delivered to wood processors and others.
2. The cross-reference table is provided as guidance by international organisations, the exact list of commodity codes used by the Forestry
3. Historical figures are as submitted to international organisations in the JFSQ final data in September.

List of Tables

Notes:

The term "ex" means that there is not a complete correlation between the two codes and that only a part of the HS2002/HS2007/HS2012 or SITC Rev.3 code is applicable.

For instance "ex4403.99" under product 1.2.NC.T means that only a part of HS2002/HS2007/HS2012 code 4403.99 refers to tropical industrial roundwood. Many tropical timber products contain "ex" codes in the above list as the Harmonized System of customs classification explicitly recognizes less than 90 tropical timber species. Species not explicitly recognized as tropical in the HS are grouped in "others" categories with non-tropical, non-coniferous timbers that are likewise not explicitly recognized by the HS (e.g. 4407.99). Estimates of tropical timber trade totals therefore require that these "others" categories be analyzed to ascertain how much of the In SITC Rev.3, if only 4 digits are shown, then all sub-headings at lower degrees of aggregation are included (for example, 634.1 includes 634.11 and 634.12).
