

LICENCE to process wood affected by *Phytophthora ramorum*

THE PLANT HEALTH (FORESTRY) ORDER 2005 as amended

PLEASE USE BLOCK CAPITALS

(TICK)

1. Applicant's Name:

Agent

Owner

2. Company (if any):

3. Applicant's Address:

4. Applicant's Tel Number:

5. Applicant's Email:

6. I apply for authority to handle and process *Phytophthora* affected wood.

7. TERMS AND CONDITIONS

I confirm that:

(a) An area of hardstanding has been designated within the premises for stacking *Phytophthora* affected wood and all co-product, residue and plant debris shall be swept up from this area and kept segregated and disposed of as set out below, and;

(b) an area of hardstanding has been designated within the premises for sweeping down vehicles after unloading, and all co-product, residue and plant debris shall be swept up from this area and kept segregated as disposed of as set out below, and;

(c) that no vehicles delivering *Phytophthora* affected wood to the premises shall be allowed to leave the premises until they have been swept clean, and ;

(d) all *Phytophthora* affected wood and bark and co-product derived from *Phytophthora* affected wood shall be **burnt on site as woodfuel or processed into manufactured panel board products (eg chipboard, oriented strandboard, medium density fibreboard etc) using heat and chemical processes.** Unless destined for burning or processing on the licenced premises *Phytophthora* affected wood material shall be kept segregated from all other wood, co-product, residue and plant debris and shall only be permitted to move under a Movement Licence to other facilities so Licenced for the purpose by the Forestry Commission, and;

(e) all subsequent movement of co-product, residue and plant debris derived from *Phytophthora* affected wood shall be in covered or enclosed transport. This does not apply to roundwood haulage.

(f) I understand that the premises may be visited by an authorised Plant Health Inspector at any reasonable time for the purpose of ensuring that these conditions are being complied with. I understand that records of all deliveries Phytophthora affected wood and records of all consignments of plant debris and sawmill co-product and residue derived from Phytophthora affected wood shall be made available to the inspector on request.

(g) Log stacks in yards must NOT be in direct contact with live growing plants eg overhanging trees species or rhododendrons and heathland species susceptible to *Phytophthora ramorum*

(h) Larch material with bark from P.ramorum affected sites must not be exported to other EU Member States or Northern Ireland in accordance with Article 2 of the EU Emergency Decision (Commission Decision 2002/757/EC).

8. I have designated the following person to be responsible for ensuring compliance with these conditions at this processing site and to be the nominated contact point for Plant Health Inspectors.

<http://www.opsi.gov.uk/si/si2005/20052517.htm>

20. DEFINITIONS:

For the purposes of this licence the following terms are defined:

"Phytophthora affected wood" shall mean any tree species originating in sites known to be infected with *Phytophthora ramorum* and from which the movement of wood has been restricted by the Forestry Commission.

"Co-product, residue and plant debris" shall be any material, organic or otherwise, that arises as a consequence of keeping, handling and processing the Phytophthora affected wood. It does not include the square sawn timber recovered, which has no restriction placed on its further movement.
